

Maternity Safety Statement

This is a monthly report, specific to the hospital named below setting out a range of information on the safety of maternity services. (Version 4 – May 2020)

Hospital Name	Cork University Maternity Hospital Reporting Month May 2022			
	This Statement is used to inform local hospital and hospital Group management in carrying out their role in safety and quality improvement. The objective in publishing the Statement each month is to provide public assurance that maternity services are delivered in an environment that promotes open disclosure.			
	It is not intended that the monthly Statement be used as a comparator with other units or that statements would be aggregated at hospital Group or national level. It assists in an early warning mechanism for issues that require local action and/ or escalation			
Purpose & Context	It is important to note tertiary and referral maternity centres will care for a higher complexity of patients (mothers and babies), therefore clinical activity in these centres will be higher and therefore no comparisons should be drawn with units that do not look after complex cases.			
	Maternity Safety Statements form part of the suite of key performance indicators for the maternity services. Hospitals must populate and publish on a monthly basis (2 months in arrears). Additionally the statements are discussed at the Hospital Group Maternity Network meetings with the National Women and Infants Health Programme as part of the quality and safety agenda.			

Headings			2022		
	Ref	Information Areas	May	Year to date	
Hospital Activities	1	Total mothers delivered ≥ 500g (n)	486	2580	
	2	Multiple pregnancies (n)	8	51	
	3	Total births ≥ 500g (n)	495	2362	
	4	Perinatal mortality rate – adjusted (per 1,000 total births)	4.0 Per 1,000	1.1 Per 1,000	
	5	In utero transfer – admitted (n)	2	4
